

2019 POLYTECHNIC GRADUATES CONTINUE TO BE IN GOOD DEMAND

Singapore, 14 January 2020 – This year's Graduate Employment Survey (GES), jointly conducted by Nanyang Polytechnic, Ngee Ann Polytechnic, Republic Polytechnic, Singapore Polytechnic and Temasek Polytechnic, showed that polytechnic graduates continue to achieve good employment outcomes, despite a global economic slowdown.

Among the 7,724 polytechnic graduate respondents who entered the labour force in 2019, 90.7% were employed¹ six months after graduation, a 1.2 percentage point increase from 2018. The proportion who were unemployed or in involuntary part-time/temporary employment decreased by 1.1 percentage points as compared to 2018 (see **Table 1** below).

Table 2: Median Gross Monthly Salary of Full-Time Permanently Employed Graduates

Fresh Graduates

8,685 out of 11,598 fresh graduates in 2019 responded to the survey. As at 1 Oct 2019, around six months after the completion of their final examinations, 60.3% of respondents were in the labour force (i.e. those who were working, or not working but actively looking and available for work). 38.9% were pursuing or preparing to begin further studies and hence not looking for jobs. This was an increase from 36.0% in 2018. Most of the remaining 0.8% said that they were taking a break and not seeking employment.

Of those in the labour force, 89.1% were employed in 2019 (see **Table 1**), a marginal increase from the 89.0% in 2018. 56.6% were in full-time permanent employment, up from 55.9% in 2018. 2.9% were working on a freelance basis and 29.6% were in part-time/temporary employment, a decrease from 30.5% in 2018. The majority of the fresh graduates in part-time/temporary employment were pursuing or preparing to begin further studies. The proportion of those in involuntary part-time/temporary employment (i.e. tried but were not successful in obtaining a full-time permanent job offer) decreased from 2.5% in 2018 to 2.3% in 2019.

² Appendix II lists all diploma courses under each course cluster.

The median gross monthly salary among fresh graduates in full-time permanent employment was \$2,300, up from \$2,270 in 2018 (see **Table 2**).

Post-National Service Graduates

5,845 out of 9,931 graduates from 2016 who completed their full-time NS between 1 Apr 2018 and 31 Mar 2019 took part in the GES 2019. 42.5% of respondents were in the labour force (i.e. those who were working or not working but actively looking and available for work). 57.2% were pursuing or preparing to begin further studies and hence not looking for jobs. This was an increase from 51.5% in 2018. Most of the remaining 0.3% said that they were taking a break and not seeking employment.

As at 1 Oct 2019, 94.1% of the respondents in the labour force were employed (see **Table 1**), an increase from 90.5% in 2018. Among those in the labour force, 70.7% were in full-time employment, up from 65.7% in 2018. 6.7% were working on a freelance basis and 16.7% were in part-time/temporary employment, a decrease from 17.5% in 2018. Similar to fresh graduate respondents, the majority of those in part-time/temporary employment were pursuing or preparing to begin further studies. The proportion of those in involuntary part-time/temporary employment (i.e. tried but were not successful in obtaining a full-time permanent job offer) was 2.1% of those in the labour force.

The median gross monthly salary of respondents who were post-NS graduates in full-time permanent employment was \$2,540, an increase from \$2,501 in 2018 (see **Table 2**).

On the outcomes of the 2019 Polytechnic GES, a spokesperson from the Polytechnic GES Committee said, "We are heartened that our polytechnic graduates continue to do well in the job market despite the global economic slowdown. Polytechnic graduates continue to be sought after by employers. The polytechnics will continue to work closely with industry partners to help ensure that our graduates have the relevant knowledge and skills to meet the needs of the economy, and are able to find good jobs and enjoy fulfilling careers."

APPENDIX I: DEFINITION OF EMPLOYMENT INDICATORS

Employment refers to the number of graduates working in full-time permanent, part-time, temporary employment and freelancing, as a proportion of graduates in the labour force (i.e. those who were working or not working but actively looking and available for work).

Full-time Permanent Employment refers to employment of at least 35 hours a week and where the employment is not temporary. It includes those on contracts of one year or more.

Freelancing refers to those who operate their own business without employing any paid worker in the conduct of their business or trade.

Part-time Employment refers to employment of less than 35 hours a week.

Temporary Employment refers to casual, interim or seasonal employment, including those on contracts of less than one year.

Involuntary part-time/temporary employment refers to those who indicated that they were in part-time/temporary employment as they had tried but were unable to obtain a full-time permanent job offer so far.

Voluntary part-time/temporary employment refers to those who indicated that they were in part-time/temporary employment as they were pursuing/ preparing to commence further studies, taking active steps to start a business venture, due to personal choice and other reasons.

Gross Monthly Salary comprises basic salary, fixed allowances, over-time pay, commissions and other regular cash payments, before deduction of the employee's CPF contributions and personal income tax. Employer's CPF contributions, bonuses, stock options, other lump sum payments and payments-in-kind are excluded.
