

Joseph graduated in 2016 with a Diploma with Merit from the Diploma in Business Applications. His outstanding performance in class saw him inducted into the Director's Roll of Honour not just once but four times. He was also a recipient of the Lee Foundation Scholarship in 2015.

Joseph represented RP in the Enterprise Resource Management Challenge, where his team came in third, and he volunteered in the Operation Smile Campaign in 2013 to raise awareness for children with cleft lips. Through his active participation in various events in and outside of RP, Joseph learnt the importance of managing his time well and was always willing to lend a helping hand to those in need.

Joseph's achievements were all the more impressive given his challenged family background. His mother passed away when he was very young and with an absent father, Joseph was brought up and supported by his paternal grandmother and aunt. Despite the adversities he faced, Joseph kept up a positive attitude in life and in learning. Rising to become one of our top graduates, Joseph thanked the RP team in his valedictory speech, as he attributed much of his success and achievements to the dedication of our passionate team of educators.

Joseph's experience is testament that, with determination and a team of committed educators, every student can expect a fruitful journey at RP.

A lot of people want a shortcut. I find the best shortcut is the long way, which can be described in two words: work hard. At RP, I have learnt that hard work pays off.
