**1100 – 1230** Now, Discover The Chain

*What exactly constitutes a career in supply chain management? By definition, supply chain is like a patchwork quilt. Four key disciplines in the supply chain have been widely identified:*

- *Planning – Strategy, Financial*
- *Procurement*
- *Manufacturing*
- *Logistics*

*The essence in striking a successful & holistic career is to be able to stitch together different components and experiences to create the full mosaic. This topic invites speakers who have experiences in the above four disciplines to share & discuss on the challenges in each of the aspect. Our Young Professional Advocate will undertake a role of a novice attempting to stitch the components with the moderator, as a veteran architect, linking each aspect to give ideas on how Young Professionals & Students can stitch the components together.*
