**How beneficial has the Hong Leong Foundation Scholarship been for you?**

It has helped me in many ways. I see this scholarship as a motivation for me to excel further in my studies so that I can match up to the recognition and expectations bestowed on me.

**Tell us more about your diploma and lessons in RP!**

Lessons in RP are very fun and I especially love the practical classes. As an aspiring pilot, I’m glad to be able to visit the A380 plane simulator in school and even get to fly airplanes virtually. Furthermore, the replica of the control tower, similar to that of Changi Airport, and the aircraft hangar in RP enables me to have hands-on learning. This is awesome because I get a taste of what it’s like to work in my dream industry.

**Scholarship Recipient**

S V Anand Kumar

Diploma in Civil Aviation

School of Engineering

Year 1

**How would you describe your journey in RP so far?**

My journey in RP has been great and very enjoyable. I’ve made many new friends and learnt many new things. I am also fond of the PBL teaching approach because it gives me the freedom to study at my own pace. Other than academics, RP has also given me plenty of opportunities to develop new skills and to be involved in many campus activities.

**What is the best thing about your diploma course?**

Lessons are fun and interesting. Unlike secondary education, I feel that I am learning something I’m interested in that is related to what I want to do in the future. As such, I’m encouraged to work even harder because I find meaning in the things I am doing. Also, one of the exciting projects that my diploma programme is working on, is to raise awareness on social enterprises at *SCAPE. I think that this project is very meaningful as it gives us a taste of how social enterprises work.
